

The American National Standards Institute (ANSI) defines Training as "Instruction to enable the trainee to become a Qualified Person regarding the task to be performed, including knowledge regarding potential hazards." Only personnel who have received general instructions regarding the inspection, application and operation of aerial platforms and/or PIT forklifts (as applicable), including recognition and avoidance of hazards associated with their operation, shall operate the equipment. The ANSI Manual of Responsibilities contain a list of the items to be covered. This form is provided as an example for use in fulfilling the ANSI record keeping requirements.
