Heavy Duty Welder Package the ultimate industrial boom welding system

Genie's powerful and robust Heavy Duty Welder Package exceeds the specifications of any boom welding system currently on the market. Genie's innovative system provides the operator the ability to perform extended industrial-duty welding from the platform and is available as

an option for the S-80/85, S-60/65 and S-40/45 telescopic booms.

Powered by a hydraulically driven 208 VAC 3-phase generator and closed-loop hydraulic drive pump, Genie's welding system produces 12,500 continuous and 13,500 peak watts – 5,000 more watts of AC power than the 7,500 watt competitive models currently available.

Conveniently mounted behind the platform decal plate, Genie's Heavy Duty Welder Package does not take up valuable platform workspace.

Standard Features:

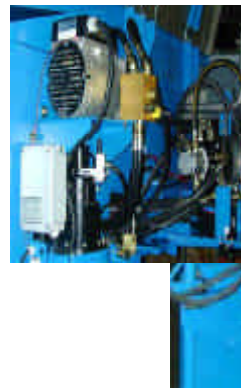

- Lincoln V275-S welder– capable of both stick and TIG (tungsten inert gas welding)
- 208 VAC 3-phase platform-mounted receptacle
- 110 AC socket – standard power to platform
- System protected by circuit breaker and GFI

Options and Accessories:

- Lincoln Pro-Cut 25 and Pro-Cut 55 plasma cutters
- Lincoln SP-175 wire feed welder – for light-duty sheet metal up to a material thickness of 5/16 in.
- Lincoln V350-LN25 combination – for structural welding or high production requirements

Specifications:

- Welder Model – Lincoln V275-S
- Input Power - hydraulically driven 208 VAC 3-phase generator
- Max Amp Output – 275A @ 35% duty
- Medium Amp - 250A @ 60% duty
- Continuous Amp Output – 200A @ 100% duty
